<u>**Vendor Details**</u>

Purpose: To address specific AI gaps within the Marine Corps Logistics Command and the Marine Corps Enterprise, focusing on key topics such as logistics and supply chain management, predictive maintenance, inventory optimization, and the integration of AI with autonomous systems. The summit will include keynote addresses, breakout sessions, panel discussions, and networking opportunities to facilitate knowledge sharing and collaboration among attendees. The speakers, consisting of experts from academia, DoD, and industry, will provide valuable insights to help close the identified AI gaps. The attributes for success encompass addressing ethical and governance aspects of AI implementation, emphasizing workforce development and training, showcasing AI applications in various aspects of logistics operations, and providing a clear way forward for AI adoption within MARCORLOGCOM and the Marine Corps enterprise.

Where: GTRI CONFERENCE CENTER, 250 14th St NW, Atlanta, GA 30318

Date: 10 – 11 September 2024
